Work includes facility modifications and renovations, as well as scheduled and preventive maintenance. These services include facility and utility operations and maintenance, utilizing a wide range of skilled trades, custodial services, and building access control.

Project Highlights

U.S. AIR FORCE – LAUGHLIN
AIR FORCE BASE

AFM provides Civil Engineering, facilities and utilities operation and maintenance, logistics, transportation, supply, airfield management, grounds maintenance, vehicle and equipment maintenance, and warehousing support for the USAF flight training base in Del Rio, TX.

Project Highlights

NATIONAL SECURITY AGENCY

AFM provides facilities operation and maintenance, warehouse support, work control, janitorial and grounds services for prime contractor Lockheed Martin at the Whitelaw Top Secret SCI facility in Ft. Gordon, Georgia.

Project Highlights

U.S. AIR FORCE – MACDILL AIR FORCE BASE

AFM was awarded the base operations support and base civil engineering services contract at MacDill Air Force Base, FL in September 2009. This contract provides the full range of base operating and civil engineering services to plan, program, design, construct, operate, and maintain base facilities for this strategically vital Air Force base. AFM provides a full range of real property maintenance and repair, utility plant operations, emergency management, and environmental services for the 6th Air Mobility Wing (6 AMW), United States Central Command (USCENTCOM), United States Special Operations Command (USSOCOM), and other MacDill tenants.

Project Highlights

U.S. ARMY – FORT GORDON

AFM was awarded the Installation Support Services contract at Fort Gordon in July 2007. The contract includes public works, maintenance, transportation, and supply functions. AFM provides maintenance and repair for 1547 structures that total 9.6 million square feet; maintenance and repair for nearly 300 heating, ventilation, and air conditioning (HVAC) units, numerous chillers and boilers, and 3 central heating and cooling plants; maintenance of 102 miles of primary roads and nearly 60,000 acres of grounds; maintenance of about 500 vehicles; and management of a supply inventory comprising well over 2000 lines.

Project Highlights

DEPARTMENT OF ENERGY

AFM is a major subcontractor performing warehousing services, including receiving, storing, and distributing materials for a variety of customers at the Hanford site. We maintain and manage general supplies and spare parts inventories, and we are responsible for management of all government property on site, as well as proper asset disposition at the end of the useful life of the property and equipment.

- Fleet Maintenance — Akima provides fleet maintenance services on vehicles and equipment for the Department of Energy and multiple contractors on the Hanford Site. This includes a rolling stock fleet of more than 3,000 over-the-road and off-road vehicles and equipment items.
- Facilities Maintenance — Akima provides comprehensive facility maintenance services for the Department of Energy and multiple contractors on the Hanford Site. This encompasses more than 650 facilities and covers virtually all trades disciplines as well as janitorial services.

Project Highlights

U.S. AIR FORCE – CANNON AIR FORCE BASE

AFM provides personnel to manage, execute, and support missions and exercises. Missions focus on specific training events typically of less than 1-day duration and involve a specific activity, such as escape and evasion maneuvers, water pickup and rescue, and drop zone training.

Our personnel establish target setup, marking, and scoring; direct aircraft; provide opposing forces; perform land and water pickups; provide capture and escape functions; execute link-up and evacuation activities; and manage the safety of the exercise.

These training exercises include Special Operations Forces for U.S. Army, Navy, Air Force, and certain international personnel. Our personnel are responsible for and perform maintenance and repair of government furnished equipment, including weapons, all-terrain vehicles, and other equipment.
