We approach every project with the goal of delivering exceptional results while respecting our clients’ timelines and budgets.

From simple renovations to complex new construction, Akima offers scalable, comprehensive solutions for any size project.

Core Capabilities

- General Construction & Renovation
- Civil & Marine Construction
- Transportation Systems

Working with Akima

Akima is an Alaska Native Corporation supporting a portfolio of 8(a) companies, small businesses, and operating companies that are both specialized and nimble—two qualities that allow us to respond quickly to each customer’s unique needs. In 2019, Akima was ranked #38 amongst the top 100 government contractors by Washington Technology.

We offer customers streamlined procurement solutions through a wide variety of government-wide acquisition contract vehicles, basic ordering agreements, and agency specific IDIQs, as well as the option of direct/sole source contracts through our 8(a) companies.

- SBA may award a direct award contract (commonly referred to as a sole source) to an 8(a) participant owned and controlled by an ANC [13 CFR 124.506(b)]
- Quick, smooth transition to full contract operations typically in 30 to 60 days
- Awards above $22M for federal civilian agencies or $100M for the Department of Defense require a simplified J&A [FAR 6.302-5(b)(4) and Class Deviation 2020 –O0009]
- Limited potential for award protest [13 CFR 124.517(a)]
- Small Disadvantaged Business Credits [13 CFR 124.109(a)(4)]
- Negotiated fair price
Representative Programs

U.S. Army
Aberdeen Proving Ground Renovation Project
Akima teams have supported several dozen construction, renovation, revitalization, alteration, and repair projects at Aberdeen Proving Ground—a 72,000-acre U.S. Army complex that is home to the world’s leaders in research, development, testing, and evaluation of material. Projects range from demolishing entire floors and constructing new collaboration spaces, to providing labor, material, and equipment to ensure structural integrity of boat landings, piers, platforms, access ladders, piping systems, and more.

U.S. Army
Pentagon Access Control Point
We provided design-build services to replace an outdated Vehicle Access Control Point (VACP) with a state-of-the-art facility that not only met all the new anti-terrorist standards, but also dramatically decreased per vehicle inspection time. This was achieved by implementing a computerized under vehicle inspection system and a license plate reader system integrated with the reservation-wide database. In conjunction with the VACP construction, our team tied the new facility into the emergency power system, repaved the 12.5-acre North Parking Lot, and replaced the transformer for the lights and call stations in the North Parking Lot.
The Akima Advantage

Our heritage makes us unique. Our commitment sets us apart.

Proven Performance

• $1.4 billion annual revenue
• Currently performing on more than 2,000 active contracts and task orders
• Operations in 43 states and 17 territories and countries

Expertise

• 100+ technology partnerships
• 1,000+ technical certifications
