

Capabilities Overview: Facilities, Maintenance & Repair

Maintain Continuity of Operations Under All Conditions

Your missions are complex.

Finding a trusted partner to help you operate at peak performance doesn't have to be.

Akima is your single source for facilities, maintenance, and repair services. The Akima portfolio of companies is dedicated to delivering the critical services required to operate and sustain facilities and equipment of all sizes. From reliability centered maintenance and repairs, to safety, energy management, and compliance—our innovative approaches save time, money, and deliver enhanced visibility for our customers.

Core Capabilities

- Base Operations
- Civil Engineering
- Facilities Operations & Maintenance
- Range Operations
- Real Property Management
- Utilities & Infrastructure Support

Working with Akima

Akima is an Alaska Native Corporation supporting a portfolio of 8(a) companies, small businesses, and operating companies that are both specialized and nimble—two qualities that allow us to respond quickly to each customers' unique needs.

We offer customers streamlined procurement solutions through a wide variety of government-wide acquisition contract vehicles, basic ordering agreements, and agency specific IDIQs, as well as the option of direct/sole source contracts through our 8(a) companies.

- SBA may award a direct award contract (commonly referred to as a sole source) to an 8(a) participant owned and controlled by an ANC [13 CFR 124.506(b)]
- Quick, smooth transition to full contract operations typically in 30 to 60 days
- No J&A required for awards up to \$100 million (DoD) and up to \$25 million (federal civilian) [FAR 6.302-5(b)(4) and Class Deviation 2020 -O0009]
- Limited potential for award protest [13 CFR 124.517(a)]
- Small Disadvantaged Business Credits [13 CFR 124.109(a)(4)]
- Negotiated fair price

Representative Programs

National Geospatial-Intelligence Agency

Next NGA West (N2W)

As a significant small business subcontractor to the McCarthy-HITT Joint Venture for their design-build-construction contract for the new NGA facility in St. Louis, Missouri, Akima integrates maintenance efficiencies into the design, develops a facilities maintenance plan as part of the build effort, supports construction operations, and establishes and populates the facility's Archibus computerized maintenance management system. Upon completion of construction, our team will provide facilities and infrastructure equipment operation and maintenance, industrial hygiene and environmental services, grounds maintenance, and management of real and property assets.

U.S. Air Force

Arnold Engineering Development Complex (AEDC) Facilities Support Services

Our team conducts the facility operations needed to enable test operations, industrial security, base operations, test facility and base infrastructure maintenance and improvement efforts, and many other services critical to operating and sustaining an active Air Force Base and the nation's largest collection of aerospace ground test facilities. The team performs work in 153 facilities ranging from an industrial security building and operations center, to six warehouses.

NASA

Facility Support Operations and Maintenance Services (FOMS)

Akima provides the full range of facility operations and maintenance support at the NASA Goddard Space Flight Center (GSFC). The GSFC site is approximately 1,428 acres, and consists of buildings, roadways, parking areas, open spaces, and underground utility infrastructure with utility plants. Akima provides 24/7 support and is often required to offer innovative approaches to meet challenging research and development requirements and schedules. Our responsibilities include preventive maintenance, repairs, trouble call response, reliability centered maintenance planning, central plant operations, and more.

U.S. Air Force – Air Mobility Command

MacDill Air Force Base Civil Engineering Services

Akima provides all personnel, equipment, tools, material, vehicles and fuel, supervision, and services to perform base civil engineer tasks and functions at MacDill Air Force Base in Tampa, FL. Our range of work includes preventive maintenance and repair for a massive infrastructure with more than 58 generators, 300 utility meters, 101 fire suppression systems, and 50.8 miles of paved roads. Our team executes an average of 6,650 preventive maintenance actions, recurring services, service calls, and minor construction items annually - completing most taskings in less than 50 hours.

DLA

Installation Support Services San Joaquin

Akima provides facility support services through efficient operations and maintenance at the DLA San Joaquin site in Tracy, CA, which consists of 71 buildings on 908 acres. Our team provides maintenance operations, preventive maintenance, and inspections of buildings, structures and installed equipment, and associated property. Skilled labor includes trades such as carpentry, plumbing, electrical, high voltage electrical, masonry, heating and air conditioning, and sheet metal working.

U.S. Navy - Naval Facilities Engineering Command

Base Operating Support for Quantico Marine Corps Base

At U.S. Marine Corps Base Quantico in Quantico, VA, we have full responsibility for the management, supervision, labor, materials, equipment, incidental engineering, and transportation necessary to provide services for force protection, facility support services, facility management, facility investment, custodial, pest control, integrated solid waste management, grounds maintenance and landscaping, pavement clearance and environmental. The team uses MAXIMOTM, a computerized maintenance management system, to receive service calls, track work order history, asset management, and condition assessment.

USDA

Eastern Regional Research Center Operations and Maintenance Support Services

Our team supports the U.S. Department of Agriculture's continuing requirement for facility operations and maintenance support services for their Eastern Regional Research Center (ERRC) in Wyndmoor, Pennsylvania. As part of this program, we furnish all labor, equipment, supervision, materials, and incidentals for operations and maintenance services such as, but not limited, to heating, ventilation and air conditioning, security, janitorial, architectural and structural, grounds maintenance, pest control, housekeeping, electrical, piped systems, utilities, shipping/receiving, and administration of work management systems. We established a program to maintain the facility free of insects and vermin in accordance with the State of Pennsylvania and manufacturer's guidelines.

USDA

Western Regional Research Center Operations and Maintenance Support Services

We provide facility operations and maintenance support services at the U.S. Department of Agriculture's Western Regional Research Center (WRRRC) located in Albany, California. Our building operations and maintenance support tasks at WRRRC include, but are not limited to, work management, administrative services, facility maintenance, grounds maintenance, and utility services. Our team provides operational and maintenance support for the entire WRRRC complex, including existing buildings, greenhouses and structures, renovated facilities, and new construction. Facilities operations and maintenance functions include the areas of work management, preventive maintenance, building maintenance, alteration and repair, installations, grounds maintenance, utilities including heating, ventilation and air conditioning/refrigeration, electrical and plumbing, housekeeping, environmental, health and safety, and administrative services.

Representative Operating Companies

The Akima Advantage

Our heritage makes us unique. Our commitment sets us apart.

Proven Performance

- \$1.4 billion annual revenue
- Currently performing on more than 2,000 active contracts and task orders
- Operations in 43 states and 17 territories and countries

Expertise

- 100+ technology partnerships
- 1,000+ technical certifications
- 24 companies with ISO 9001:2015
- AS9100 and AS9110
- CMMI Level 2 and 3
- Over 50% of the workforce holds government security clearances

Contracting Advantages

- Small business awardees on multiple IDIQ & GWACs
- 8(a) Direct Awards
- Direct negotiated contracts
- Limited potential for award protest
- Small Disadvantaged Business and Native American Credits
- Simplified and accelerated procurements
