

AKIMA

GLOBAL TECHNOLOGY

Mission Critical Services, Priority Driven Solutions

There are many roads to IT optimization.

The trick is to find the one that will get you there and keep you there—from the data center to the desktop—with an uncompromising security posture. And do it at a pace and a price that best resolves the issues most critical to you and your constituents as you go. This is what we at Akima Global Technology (AGT) do daily for each of our customers.

Our Capabilities

Utilizing proven commercial best practice implementation models to meet your most stringent technical, operational and service delivery outcomes, Akima Global Technology supports you at every point across your solutions lifecycle.

Data Center Services

Private and public cloud computing, data center to desktop virtualization, infrastructure, storage, hot failover/COOP, operations and management, performance optimization.

Information Technology Services

Network and security management, COTS integration and middleware consulting.

Oracle Technology Services

Database migration, Exadata and Exalogic, Oracle 12c cloud control, high availability and replication, managed security services, database/application server architecture planning and administration, disaster recovery, performance optimization, integration with 3rd party systems.

Cybersecurity

Security architecture, infrastructure and engineering support, NIST security best practices, convergence technology, continuous monitoring and 24x7 response, insider threat protection, Big Data, virtualization, the Cloud and compliance.

Mission Support Services

Supporting customer's dynamic personnel, logistics and hardware procurement and configuration requirements. Expertise includes proven project and technical management, subject matter expertise, IT operations, warehouse and maintenance management and business office operations support. Additional expertise includes site surveys, product lifecycle management and all tasks involved in specialized component kitting, inspection, inventory and shipping coordination.

Past Performance

Air Force Active Directory and Exchange (ADX) Migration

Among the largest ever migrations of multiple active directories, AGT managed the consolidation of 840,000 users and 1.9 million computing objects at 12 Major Commands worldwide onto AFNet, the Air Force's single, integrated global network.

United States Marine Corps (USMC)

Procure all tasks required to procure, kit, mark and deliver the Program Manager Marine Intelligence/Surveillance and Target Identification (PMMI/STI) suites/ kits, spares and accompanying documentation. Following inspection and acceptance at the AGT managed and operated warehouse, we coordinate logistics for kit shipment to USMC locations.

Food and Drug Administration (FDA)

Provide enterprise architecture planning, new development, operation, maintenance and backup/recovery support for Oracle products including Grid infrastructure, RDBMS, Cloud Control, Fusion Middleware, Web Logic Server and Access Management and Thesaurus Management System. Additional services include complete database and middleware environment provisioning and support for hardware upgrades and new releases of system and application software.

U.S. Patent and Trademark Office (USPTO)

AGT Oracle architects and engineers design, implement, maintain and manage all key Oracle-driven operations for the USPTO.

Bureau of Indian Affairs (BIA)

AGT provides the BIA with its complete Information Assurance strategy and all component elements, including security engineering and architecture, monitoring, vulnerability analysis, incident tracking and response, data loss prevention and computer forensics.

Defense Information Systems Agency (DISA)

AGT security engineers test and evaluate software and hardware for vulnerabilities during development, determine optimum security fixes when required and coordinate the site accreditation package.

U.S. Naval Air Command (NAVAIR)

Utilizing Agile Project Management with Scrum, AGT created the U.S. Navy's Next Generation Air Worthiness website. This site includes all items, processes and workflows required for any Naval office worldwide to attain flight clearance.

The AGT Difference

AGT is a trusted provider of mission critical technology services and solutions to the Federal Government with one very crucial difference: we add value by using your most critical mission priorities and pain points as building blocks for a cost-smart and flexible enterprise business strategy.

The result: your mission moves forward at your pace—with your dollars always optimized on your most important business objectives to ensure faster time-to-benefit and maximum return - on - investment. This is the AGT advantage.

About Akima Global Technology

Akima Global Technology (AGT) is an Alaska Native Corporation (ANC), a Small Disadvantaged Business (SDB) and a wholly owned subsidiary of Akima. Headquartered in Herndon, Virginia, Akima supports a network of over three dozen socioeconomically disadvantaged small businesses through an innovative shared services model that provides business processes and shared back-office support at a level akin to that found in a Fortune 500 defense contractor.

This enables Akima's portfolio of companies to operate as a small business in terms of autonomy, customer interaction and decision making, while receiving support from an organization with more than 30 years of experience working with the federal government.
