

AN AKIMA COMPANY

Administered by the General Services Administration (GSA), Alliant 3 is a multiple-award Governmentwide Acquisition Contract (GWAC) that provides maximum flexibility in acquiring an IT services-based solution for any conceivable IT services-based requirement, driving government savings through efficiencies and improved reporting data with greater integrity, while maintaining an “Anything IT Anywhere” philosophy. Alliant 3 includes any and all components of an integrated IT services-based solution, including all current leading-edge technologies and any new technologies, which may emerge during the Master Contract Period of Performance.

Anything IT *Anywhere*

Contract Features and Benefits

- Alignment with Federal Enterprise Architecture and Department of Defense Enterprise Architecture to enable new and creative technologies.
- Contractor engagement metrics for bid and award requirements.
- Defense Federal Acquisition Regulation Supplement clauses as an attachment to the master contract.
- Flexibility in task order structure through the use of hybrid CLIN configurations.
- Small business subcontracting credit at the task order level during the life of the contract. Funding agencies receive the credit in eSRS.
- Office of Management and Budget — OMB — designation as a preferred governmentwide solution.

Meeting Critical Needs with Trusted Solutions

Our Capabilities

Enterprise IT & Infrastructure

Where mission performance begins—everywhere you operate.

Tuvli designs, operates, and modernizes the core IT infrastructure federal missions rely on around the world.

Capabilities include:

- ITSM and Tier 1–3 service desks
- End-user and desktop support
- Network engineering, data centers, telephony, Wi-Fi, and cabling
- Database administration and enterprise hosting
- CONUS/OCONUS operational support
- Enterprise design, integration, and consolidation
- Next Generation data center services

Cyber

Zero Trust aligned.
Mission-fortified—worldwide.

Tuvli protects federal systems with cybersecurity engineered for evolving threats and contested environments.

Capabilities include:

- RMF/FISMA compliance and secure engineering
- SOC operations, monitoring, and threat detection
- Vulnerability management and penetration testing
- Zero Trust architectures, IAM, and endpoint security
- Digital forensics and incident response

Data, AI & Automation

Transforming data into decisive global and operational advantage.

Tuvli builds modern data ecosystems and analytics environments that unlock insight and support intelligent decision-making at scale.

Capabilities include:

- Data platforms, governance, and business intelligence
- AI/ML model development and deployment
- RPA and workflow automation
- Cloud-scale analytics and predictive insights

To ensure adoption of next-generation systems, we provide AI-powered coaching, digital twin environments, and adaptive training pathways that strengthen analytics competencies across distributed teams.

Application Development & Digital Modernization

Speed, agility, and cloud-first development.

Tuvli modernizes legacy systems and rapidly delivers secure, scalable applications that support global mission needs.

Capabilities include:

- DevSecOps, CI/CD, and software factory support
- Cloud-native and low-code/no-code development
- Enterprise architecture and cloud migration
- Legacy system refactoring and modernization

As a wholly owned subsidiary of Akima, LLC, Tuvli delivers comprehensive professional services to support federal agency missions. As a trusted partner, our experienced staff work alongside customers to ensure our solutions are strictly aligned with agency processes and desired program outcomes. Emphasizing affordability across the entire solution lifecycle, Tuvli delivers the best value for technology investments.
